

Task 8: Show a pop-up for when a raffle is detected, sound included

- Have a setting page for sound
- Have a function to call for this popup to show
- Pop-up shows at bottom right corner, new one appears further up the screen than the old one
- When left clicked, it disappears
- When right clicked, it joins the channel

Task 9: Generalize the pop-up so it can be used for other purposes

- Generalize the function so the event type, message, channels can be changed

Task 11: Automate the login process

- Be able to login without having to modify login or client-ID the files
- Detect if user has already logged in
- Be able to logout and switch account
- Be able to keep the login information when the application is closed
- Skip the login process when there is already one
